

all NEMO Committee Communication Note: 15 July 2021

Save the date – 14th October 2021

All NEMOs will organise a webinar to provide market participants and stakeholders information on the published „CACM Annual Report 2020“ with details on intraday and day-ahead coupling.

The third CACM Annual Report prepared by the Nominated Electricity Market Operators (NEMOs) in cooperation with Transmission System Operators (TSOs) monitors the implementation of the Capacity Allocation and Congestion Management Regulation (CACM Regulation) and the associated Algorithm methodology. The report provides a comprehensive overview of the single day-ahead coupling (SDAC) and single intraday coupling (SIDC) operations in 2020 and gives a broad outline of the current and future performance of market coupling algorithms and the R&D activities undertaken.

Besides the 2020 data of the market couplings, an additional policy session with guest speakers will be held focusing on the upcoming changes in 2022 for SDAC and SIDC.

The agenda will be published soon.

The NEMO Committee takes this opportunity to announce that the video of the CACM Annual Report 2019 webinar held by the NEMO Committee in cooperation with ENTSOe on the 8th of July 2020 has been published Youtube.

About all NEMO Committee:

The All NEMO Committee facilitates the cooperation among NEMOs for all common European tasks necessary for the efficient and secure design, implementation and operation of single day-ahead and intraday coupling. The All NEMO Committee is formed by the appointed representatives of each NEMO.
