

All NEMO Committee Press Release: 25 September 2023

The All NEMO Committee hosted its first Annual Conference in Brussels on 20 September 2023, with over 150 participants

The successful event commenced with an inspiring keynote speech by Catharina Sikow-Magny, Director of Green Transition and Energy System Integration in the Directorate General for Energy. She emphasized that the "EU electricity system is the most reliable in the world" and that "...we must be proud of the European market coupling, a unique energy market integration development in the world".

The conference included a policy session where leading stakeholders shared the latest insights on Electricity Market reform. We had the privilege of welcoming Nicolás González Casares, Member of the European Parliament, who strongly advocated for the protection of vulnerable consumers as a crucial aspect of the electricity market reform negotiation process. He also emphasized "...we need to preserve our internal energy markets...There is a big consensus on the right way NEMOs are working on..."

The All NEMO Committee extends its gratitude to all the outstanding moderators and speakers including Hélène Robaye, Jérôme Le Page, Mátyás Vajta, Salvatore Lanza, Jasmina Trhulj, Kjell Barmsnes, André Estermann, Michela Beltracchi, Hilde Rosenblad, and Cosimo Campidoglio for generously sharing their impressive knowledge and experience with the audience.
